1 DAY FMEA FACILITATION

Aim: To expose the unforeseen risks that will prevent your product being delivered on time, on budget and on spec.

Objectives:

- Clarify the programme requirements of cost, delivery and product performance
- Using a team approach explore and expose the potential failures
- Use a 'lean' FMEA technique in order to prioritise the risks and identify the top 10
- Create a S.M.A.R.T. action list targeted on completion before the first components are manufactured.

Pre-requisites:

- An initial consultation meeting to confirm that the programme requirements are available and that a mixed discipline team can be formed for a day
- No more than 7 participants (excluding facilitator).
